

SURVEY ON TRANSPLANT ACTIVITY 2008

Table 1: Report the total number of patients receiving their 1st transplant in your centre in 2008. Include the first allogeneic and/or first autologous transplant per patient according to indication and stem cell source. Other 'non first transplants' should be reported below in table 2 (allogeneic) or table 3 (autologous). Help with entering your data and other general information can be found in the guidelines. Non-id* = any family member (matched or mismatched) other than HLA - id sibling or twin.

 Table 1 Indication		NUMBER OF PATIENTS RECEIVING FIRST TRANSPLANTS ONLY IN 2008															Total allo after auto		
		allogeneic									autologous			Total					
		HLA - id sibling			family			unrelated						Allo	auto	Total			
		BM	PBSC	Cord	BM	PBSC	Cord	BM	PBSC	Cord	BM	PBSC	Cord	BM	PBSC	Cord			
Leukemias	AML 1st CR																		
	non 1st CR																		
	ALL 1st CR																		
	non 1st CR																		
	CML 1st cP																		
	not 1st cP																		
	MDS incl. Sec AL																		
MPS																			
CLL incl. PLL																			
LPD	PCD - Myeloma																		
	PCD - other																		
	HD																		
	NHL																		
Solid tumors	Neuroblastoma																		
	Soft tissue																		
	Germ cell tumors																		
	Breast Ca.																		
	Ewing																		
	Renal Ca.																		
	Melanoma																		
	Colon Ca.																		
	Other solid tumors																		
Non - Malignant disorders	BM aplasia - SAA																		
	BM aplasia - other																		
	Hemoglob-thalassemia																		
	Hemoglob- other																		
	Prim. Immune deficiencies																		
	Inherit.dis of metabolism																		
Auto immune disease

TOTAL (1st transplants)																			

Table 2: Allogeneic Transplants (non first TX)	BM	PBSC	Cord
Retransplants: allogeneic in 2008			
Additional transplants: allogeneic in 2008			

Table 3: Autologous Transplants (non first TX)	BM	PBSC
Retransplants: autologous in 2008		
Additional transplants: autologous in 2008		

Table 4: General Information	ALLO	AUTO
Cord Blood transplants in 2008		
Reduced Intensity Conditioning transplants in 2008		X
Patients receiving Donor Lymphocyte Infusions (DLI) in 2008		X
Patients receiving Mesenchymal stromal cells (MSC) in 2008		
Patients receiving Hematopoietic Stem Cells(HSC) for non hematopoietic use in 2008	cardiovascular	
	neurological	
	tissue repair	

Table 5: Totals	ALLO	AUTO	TOTAL
TOTAL number of all TRANSPLANTS in 2008
