

Nurses Group Global Educational Committee

Educational activities 2020

Julia Ruiz¹ & Eugenia Trigoso²

1 Hospital Infantil Universitario Niño Jesús. Madrid, Spain

2 Hospital Universitario y Politécnico LA FE. Valencia, Spain.

Introduction

The GEC is a cross-sectional committee, in collaboration with EBMT Nurses Board, other Committees and various Nurse Groups aims to coordinate and organize outreach meetings in cooperation with other non-profit associations with the same mission and objectives. Together they coordinate and provide a range of educational activities for nurses and allied health professionals within the field of Haematology and Haematopoietic Stem Cell Transplantation.

Main activities are:

- Designing the programs for the Nurses' Education/Training Day
- Cooperate with other non-profit associations
- Contribute to fundraising for outreach missions
- Share information and updates with the rest of the committee members and relevant collaborators.

Objectives

The main objective is to play a key role in the organization and coordination of educational HSCT Nursing events and activities in low-and-middle-income countries, in collaboration with like-minded entities within the field of hematology and HSCT.

Working closely with nurses from LIMCs is pivotal to be able to setup an adequate training program and meet their requirements. Engaging nurses and an active involvement is essential as they are knowledgeable of the local culture, tradition, priorities, resources and will provide their experience to lead the educational activities to success.

Other objectives are:

- To support establishment of BMT National Nurses Group.
- Promote networking

Projects

PROJECT LATIN AMERICA:

EBMT and LABMT established an agreement to offer collaborative educational activities.

Live webinars for nurses were organized and hosted by experts from both societies.

The objective of these webinars was to obtain the knowledge and skills necessary to guarantee high quality nursing care for patients receiving an hematopoietic stem cell transplant.

All live webinars were hosted in Spanish. The complete course will be available on the EBMT e-learning platform. When all the talks are aired and uploaded, the attendees will have the opportunity to take an exam. The fact of having chosen 10 hours of training is not arbitrary since it is the number of annual training hours recommended in the JACIE standards.

Topics and attendees of EBMT-LABMT e-learning webinars

SPEAKER	TITLE	AUDIENCE	REGISTRATIONS				ATTENDEES
			TOTAL	FROM EBMT	FROM OTHER SOCIETYS	NOT MEMBERS	
Eugenia Trigoso	Quality Management and FACT-JACIE Accreditation. Role of the Nurse Coordinator.	Nurses	203	42	49	112	92

Conclusión

Despite all the difficulties that COVID -19 has faced us ... we have tried to continue working with the same enthusiasm, trying to meet our objectives of collaboration, training and support for nurses caring for patients facing HSCT in developing countries.

In this 2020, EBMT-LABMT collaboration has been a success having:

- A strong LABMT Nurses group, that was supported by EBMT GEC, that now lead their own projects
- E-learning course as a collaborative EBMT-LABMT educational activity with a certificate, proof of attendance and evaluation.

Planned projects

EUROPE

East Forum Group:

- Support Chair, main activity rebuild East Forum Nurses Group.
- Collaborate in educational projects as needed.

INDIA

- Collaboration with India in a new educational project: EBMT MIDDLE-INCOME COUNTRIES PEDIATRIC ADVANCED CARE TRAINING (EMPACT) 2021-2022
