

EBMT Strategic Plan 2023-2026

MISSION

We are a community of healthcare professionals focused on innovation, research and the advancement of cellular and stem cell-based therapies to save and improve the lives of patients with blood-related disorders.

VISION

As one of the leading medical and scientific organisations for cellular and stem cell-based therapies, we aim to be the connection between patients, scientific community and other stakeholders to anticipate the future of our field.

SUPPORT UNIT

Building the conditions for EBMT success

- 1 Improve the EBMT Governance
- 2 Improve communication & alignment with internal and external parties

To support its mission, the EBMT will focus on **11 strategic goals** in 2023-2026.

Science

Transform science on blood and marrow transplantation and advanced cellular therapy through collaborative platforms and translational evidence and innovation, to become the EU reference in the field with global impact.

- 1 Re-engage the commitment from centres & members and attract new talent
- 2 Improve the quality of the scientific output
- 3 Improve the accuracy in timely resourcing of studies, projects and building a quality framework to deliver according to plan

Education

Leverage the community's awareness and people's knowledge, skills, and attitudes with non-biased and reliable educational resources to improve standards of BMT and CT and patient outcomes across borders.

- 1 Implement an innovative core curriculum for career development
- 2 Reach academic recognition of EBMT education
- 3 Motivate engagement with EBMT through education

Quality Care & Advocacy

As a global community, continuously improve the cell therapy delivery for all involved.

- 1 Encourage a culture of continuous improvement within the JACIE community
- 2 Adapt the JACIE standards and accreditation process to meet our stakeholders' needs
- 3 Develop a global community through partnerships, education and training

Transform science on blood and marrow transplantation and advanced cellular therapy through collaborative platforms and translational evidence and innovation, to become the EU reference in the field with global impact.

Strategic Goals and Objectives

1. Re-engage the commitment from centres and members and attract new talent

Review the membership model and implement new centres' relationship model that fosters collaboration and reciprocal value

Develop strategic stakeholder model to build relationships with national and international stakeholders/partners to reinforce data collection/sharing

2. Improve the quality of the scientific output

Implement the new EBMT Registry to create and facilitate future-proof data collection and data sharing by applying a common data model

Build a prospective study infrastructure to produce high-quality data

Reaffirm the role of the Scientific Council and review the SC TOR, WP Chair JD/role

Improve the Data Quality through new functionalities in DB to avoid manual data cleaning/checks

3. Improve the accuracy in timely resourcing of studies, projects and building a quality framework to deliver according to plan

Implement a project/resource planning system

Implement a standardised selection process for study proposals that includes study plan(ning) & feasibility

Redefine the budget distribution to foster new scientific output

Education

Leverage the community's awareness and people's knowledge, skills, and attitudes with non-biased and reliable educational resources to improve standards of BMT and CT and patient outcomes across borders.

Strategic Goals and Objectives

1. Implement an innovative core curriculum for career development

Create an efficient and innovative education committee

Create an inventory of existing educational resources

Develop the career journey for the health care professionals involved and implement them

2. Reach academic recognition of EBMT education

Build a strong relationship with 2 targeted EBMT national societies

Implement the roadmap to get accreditations from 2 EBMT national societies

Implement an advocacy campaign to extend accreditations to 10 EBMT national societies

3. Motivate engagement with EBMT through education

Implement a new membership model

Optimise Customer Relationship Management software (CRM) for membership

Expand the use of diverse platforms for education

Quality Care & Advocacy

As a global community, continuously improve the cell therapy delivery for all involved.

Strategic Goals and Objectives

1. Encourage a culture of continuous improvement within the JACIE community

Embed QMS working (e.g. ISO accreditation) into the JACIE Office's operational activity

Define key performance indicators for the JACIE Office's operational activity

Use benchmarking as a continuous improvement tool within the clinical setting and the accreditation process

2. Adapt the JACIE standards and accreditation process to meet our stakeholders' needs

Establish a JACIE WP

Redesign the accreditation process to support a 5-month end-to-end accreditation period

Redefine and refresh JACIE partnerships, specifically with FACT

3. Develop a global community through partnerships, education and training

Raise awareness of the role of JACIE inspector, refresh inspector training, and provide incentives

Implement a centre partnership program

Expand existing educational programs for inspectors with recognition and support from professional bodies
