

## CHEMOTHERAPY, DRUGS, AGENTS-

This document contains three lists:

- 1) Individual drugs/agents
- 2) Known protocols
- 3) Old protocol descriptions

Each table has the name of the drug, the code by which it is represented in the database, and the name by which this drug appears in the database if the drug can be known by more than one name.

### 1. Individual drugs/agents

| Drug Name (synonym)               | Code | Name in database                  |
|-----------------------------------|------|-----------------------------------|
| 2-CdA                             | 63   | 2-CdA                             |
| 4-demethoxydaunorubicin           | 18   | Idarubicine                       |
| 5- Fluorouracil                   | 20   | Fluorouracil                      |
| 5FU                               | 20   | Fluorouracil                      |
| 6-mercaptopurine                  | 22   | Mercaptapur6                      |
| 6-MP                              | 22   | Mercaptapur6                      |
| Acridinyl anisidide               | 2    | Amsacrine                         |
| Actinomycin D                     | 65   | Dactinomycin                      |
| Acyclovir                         | 311  | Acyclovir                         |
| Adcetris                          | 666  | Brentuximab (Adcetris)            |
| Adriamycine                       | 1    | Adriamycine                       |
| Adriblastin                       | 1    | Adriamycine                       |
| Advagraf                          | 52   | Tacrolimus                        |
| Agrylin                           | 351  | Anagrelide                        |
| Aldesleukin                       | 206  | IL-2                              |
| Alentuzumab                       | 632  | Campath (CD52, Alentuzumab)       |
| Alexan                            | 3    | ARA-C / Cytarabine                |
| ALG                               | 35   | ALG                               |
| Alkeran                           | 21   | Melphalan                         |
| AMD-3100                          | 36   | Plerixafor                        |
| Amethopterin                      | 23   | Methotrexate                      |
| Amikin                            | 326  | Amikin                            |
| AML like therapy                  | 43   | AML like therapy                  |
| AMSA P-D                          | 2    | Amsacrine                         |
| Amsacrine                         | 2    | Amsacrine                         |
| Anagrelide                        | 351  | Anagrelide                        |
| Analgesics                        | 88   | Analgesics                        |
| Androgens                         | 39   | Androgens                         |
| Anthracycline                     | 57   | Anthracycline                     |
| Anti IL6                          | 643  | Anti IL6                          |
| anti rIL2 (CD25)                  | 636  | anti rIL2 (CD25)                  |
| Anti tumour necrosis factor (TNF) | 639  | Anti tumour necrosis factor (TNF) |
| Anti-GD2                          | 644  | Anti-GD2                          |
| antiLFA1                          | 635  | antiLFA1                          |
| Antilymphocyte globulin           | 35   | ALG                               |
