Zinaida Perić
TCWP Chair
Croatia

Major achievements

During 2023 the TCWP finalised several important projects including the **new guidelines** on prevention and management of GVHD as well as joint ERS/EBMT Task force guidelines on pulmonary GVHD which are both in the process of publications.

Several other important **studies** were also finalised in the form of publications, including the first real-life experience with cytopenias and organ complications after CAR-T therapies as well as the first AI study conducted in the TCWP on the mortality and NRM after allogeneic HSCT.

Furthermore, the TCWP followed the same successful format of the previous year and conducted a successful **educational meeting** in September in Copenhagen in a format of patient case discussion and sharing practical skills. Patient advocates, nurses and physicians all participated, significantly improving the audience engagement in the activities and resulting in a very positive feedback.

Finally, significant work was also done in the **harmonisation of definitions** for the new EBMT Registry to improve the quality and speed of TCWP studies in the future.

Principal research studies

Outcomes and risk factors for survival of lung transplantation after allogeneic HSCT
Study type
Retrospective Studies
Diseases

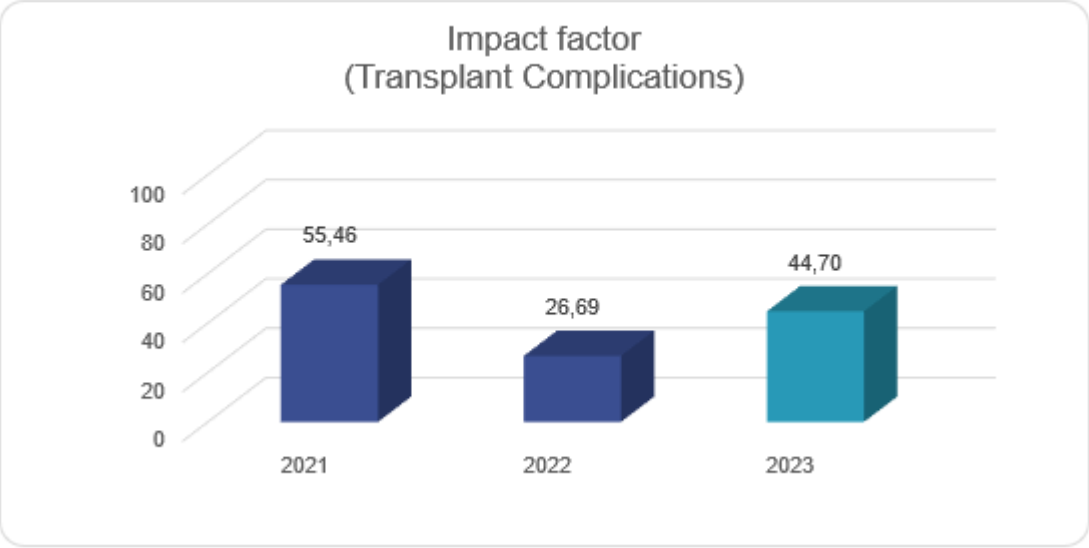

Group
Complications Working Party (CWP)
Type of treatment
Allogeneic
Principal investigator
Juan Montoro Gomez; Saskia Bos

Key publications

2023
Severe cytopenia after CD19 CAR T-cell therapy: a retrospective study from the EBMT Transplant Complications Working Party
Group
Cellular Therapy & Immunobiology Working Party (CTIWP)
Infectious Diseases Working Party (IDWP)
Complications Working Party (CWP)
1st listed author
