

Breadcrumb

Entity Print

The Committee is composed of patient advocates of EU patient organisations representing patients with haematological diseases, and national patient associations as well as a representative of the EBMT Nurses Group from the country where the upcoming Annual Meeting is taking place to participate in the organisation of Patient, Family and Donor Day.

Bregje Verhoeven
PATIENT ADVOCACY COMMITTEE CHAIR
Netherlands

Major achievements

The patient advocacy committee (PAC) is chaired by Bregje Verhoeven. Since 2020 it is divided into the three subcommittees: Advocacy by Natacha Bolanos, Education by Sarah Hutton and the sub-committee Science by Andrea Linke. Since its foundation in 2018 the activities of the committee are growing steadily.

Our mission is Patient engagement voicing the patient perspective, as an integral part of EBMT organization including governance and activities to help safe patients' life and better QoL.

Our vision is building a stable committee with a diversity of members, which is visible and representative in EBMT organization and its (scientific) activities including activities with other related stakeholders.

The main activity of the committee is the organisation of the Patient Family Donor Day and the Patient Advocacy Sessions program at the Annual Meeting. Since the foundation of the PAC in 2018, we have seen an increase in active collaboration with various Working Parties, Committees and Nurse Group. PAC members are being invited as speakers at educational events, join studies of the TCWP. Co-authorship in publications took place twice and has decreased compared to 2020.

The PAC conducts monthly teleconferences in order to follow the evolution of all the activities. We continued to keep strong links with European Patient Organisations to promote EBMT activities and to provide patient expertise to EBMT. On Twitter we have grown to 224 followers.

The PAC is also strongly committed to educational activities and we continuously encourage EBMT members to be open to the possibilities of patient engagement.

Key activities

Oral presentations

1. "A perspective on health inequalities: inequalities in access to bone marrow transplant" ED&I session Annual Meeting
2. "The patient perspective" 6th International Transplant Course 3-4 September 2021
