## Entity Print

Krzysztof Kalwak

PDWP Chair (ELECTED APRIL 2023, PREVIOUS CHAIR: Selim Corbacioglu)  
Germany

## Major achievements

The second year of the term under Chairman Krzysztof Kalwak was characterised by significantly increased scientific activity, with a total impact factor of 79.10.

**Publications in high-ranking journals** (*Blood, Leukemia, Am J Hematol*, et al.), along with growing collaborative efforts—both in Europe and intercontinentally—produced excellent results. **PDWP-conducted studies** were

also presented at the 2024 ASH Meeting in San Diego, in the Oral and Poster Sessions (see [news article](#)).

The Paediatrics' Day at the 50th Annual Meeting of the EBMT was exceptionally well-attended, and two young colleagues—Francesca del Bufalo and Rob Chiesa—received the prestigious **Dietrich-Niethammer Award** for their exceptional scientific achievements, including publications in *NEJM* (read more [here](#)).

DIETRICH NIETHAMMER AWARD to Francesca Del Bufalo (Italy) for the presentation titled: CAR-T cells for relapsed or refractory neuroblastoma – a hype or hope?

DIETRICH NIETHAMMER AWARD to Robert Chiesa (United Kingdom) for the presentation titled: Base edited CD7 CAR-T cell therapy in relapsed T-ALL

Among the numerous studies conducted by the Working Party, an **impactful investigation** comparing leukaemia-free survival outcomes between the TCR  $\alpha\beta$ /CD19+ depletion approach and the PTCY approach in paediatric HLA-haploidentical transplants has recently been initiated.

On the education front, the **9th International Transplant and Cellular Therapy Course** featured an **extensive paediatric programme** that occupied almost an entire day of the event.

A major educational event was organised as a joint meeting with TCWP for November 2024. However, it had to be cancelled at the last minute due to a weather emergency in Malaga, Spain. The exciting meeting on complications in CAR T-cell therapy took place in January 2025.

## Principal research studies
