

The Joint Accreditation Committee-ISCT & EBMT is a not-for-profit body established in 1998 for the purposes of assessment and accreditation in the field of haematopoietic stem cell (HSC) transplantation. JACIE's primary aim is to promote high quality patient care and laboratory performance in haematopoietic stem cell collection, processing and transplantation centres through the development of global standards and an internationally recognised system of accreditation.

JACIE & Immune Effector Cells

- Immune Effector Cells (IEC) include CAR-T cell therapy
- IEC have been included in the scope of the FACT-JACIE Standards since 2017
- JACIE accreditation for administration of IEC is an option for centres when applying for accreditation. Alternatively, accredited centres can request for the scope to be extended to include IEC administration
- The standards emphasise the need for robust relationships with Intensive Care and Neurology to name just 2 specialities. The high toxicity profile of IEC such as CAR-T requires that planning and preparation for patient safety aspects has been performed and that the centre demonstrates its capacity to respond to adverse reactions and events in a timely way. Centres need to show clear evidence of training and experience in managing these products and patients.
- Contact JACIE for more information

Why become a JACIE Inspector?

Benefits:

- The inspection is an excellent way of learning about JACIE for you own centre
- Visit other centres (in your country or abroad) and see best practices, how other professionals work and organize themselves
- Contribute to promote and implement quality in the transplant community
- Discounts in fees: Centres with active inspectors can avail of discounts of up to 20% for their next accreditation fees
- Annual Meeting: 25 grants to cover EBMT 2019 registration fees awarded
