PATIENT CARE

EBMT | European Society for Blood and Marrow Transplantation

The EBMT is a not-for-profit medical and scientific organisation established in 1974 dedicated to fighting life-threatening blood cancers and diseases and improving patients' lives.

EBMT Members – more than 4,000 physicians, nurses, scientists and other healthcare professionals – participate in a unique collaborative network of peers involved in Haematopoietic Stem Cell Transplantation (HSCT) and cellular therapy research. Membership encompasses more than 500 centres from over 60 countries performing or otherwise involved in HSCT & Cell Therapy.

The EBMT plays a central role in performing co-operative studies and disseminating state-of-the-art knowledge. Our goal is to increase survival rates and enhance the quality of life of patients with life-threatening blood cancers and diseases.

Benefits of the EBMT Partner of Excellence

VISIBILITY

In 2018, EBMT launched its new website with more than 200 pages of content related to BMT & Cell Therapy, studies and the latest news in the field. The EBMT website, with almost 20,000 visits per month, is the perfect platform to boost your visibility among all our users.

As an EBMT Partner of Excellence, your logo will be listed as a supporter of the EBMT on our website and in our marketing and promotional collateral, such as our Annual Report, with more than 3,000 copies printed and distributed each year.

EBMT TRANSPLANT ACTIVITY SURVEY

In 1990, the EBMT introduced an annual survey to collect data on patients treated with HSCT according to indication, donor type and stem cell source. Its importance was immediately realised and since then, the survey – known within the transplant community as the Activity Survey – has become an essential tool for assessing the real picture of HSCT in Europe each year by: illustrating the current status, identifying trends, and providing essential data for research and planning. Its structure, standardised over many years, and the excellent commitment of the participating teams has opened the possibility to observe changes over time and to evaluate the factors associated with such changes.

Partners will be provided with a standard activity survey report from the previous year in Excel format.

PARTICIPATION IN EBMT SCIENTIFIC STUDIES

EBMT is interested in supporting the clinical research needs of corporate members with our extensive data services.

Industry partners are entitled to participate in, or to conduct, EBMT Studies. Based on diverse specific agreements including separate tailor-made budgets, partners can also use the resources and know-how of the EBMT Study Offices (Paris and Leiden) to obtain feasibility reports, feasibility surveys, statistical analyses, retrospective data collection studies, (prospective) non-interventional studies, Post-Authorization Safety Studies (PASS) or Clinical Trials investigating topics in HSCT and Cell Therapy.

Through our experience and access to experts in the field we can advise on the best design for your project. We offer a flexible approach to provide a tailor-made service package supporting the needs/meeting the demands of your project, ranging from consultancy to biostatistics and full PASS or clinical trial management.

ACCESS TO EBMT EXPERTS

The EBMT has a network of more than 500 centres in 60 countries; this allows the EBMT to coordinate studies, educational events and patient care strategies.

Partners will have access to, and communication with, some of the key opinion leaders in the field. EBMT Board Members, Working Party Chairs and the EBMT Scientific Committee work together on scientific and educational projects.

EBMT PHARMA MEETINGS

EBMT will organise regular meetings with the industry, in order to share updates about our projects, studies and future endeavours. This will be a great opportunity to network and interact with other companies, EBMT working party members, as well as receive scientific input from experts in the field, exchange of information on new developments, open discussions, launch joint initiatives or receive information about potential future collaborations with the EBMT.

Become an EBMT Partner of Excellence

Becoming a corporate sponsor will allow you to work and collaborate with the EBMT community on different ventures, within your specific area of interest. With your support, we will be able to invest in enhancing the registry, data quality and scientific studies, improving patient care and outcome.

Your sponsorship agreement with the EBMT grants eligibility to work with us on personalized projects at a reduced rate. Costs will be assessed on a case by case basis and are independent of the membership fees.

All rates are locked in for the duration of your contract, irrespective of possible price increases. You can choose between our different enrolment plans in order to make the most out of our partnership.

SERVICES PROVIDED BY EBMT:

- Trial design and protocol development
- Project management
- Site management
- eCRF development and database maintenance
- Registry training
- Long-term data collection
- Data management and reporting
- On-site and remote monitoring
- Statistics

Membership Fees

EPE BASIC

25,000€
1 year

This EBMT
Partner of Excellence
plan includes a flat
membership fee
for 1 year.

EPE PLUS

65,000€
3 years

An EBMT
Partner of Excellence
plan includes a flat
membership fee
for 3 years.

EPE PREMIUM

100,000€
5 years

An EBMT
Partner of Excellence
plan includes a flat
membership fee
for 5 years.*

*With EPE Premium, you save one year in membership fees and eliminate the risk of being affected by possible membership price increases, over the five-year period.
