

Dear Colleagues,

On June 25, 2019, the Czech Registry organizes a new MACRO database training. The training will be in English and supported by participation of Carmen Ruiz de Elvira from the London Office. Since we still have vacant places in the training room, we would like to offer you the opportunity to participate. The training will take place from 10.00 – 16.00 in the center of Prague (U Nemocnice 4 street, Prague 2, Institute of Scientific Information, 1st Faculty of Medicine, Charles University, ground floor, right at the end). The full agenda will be sent to registered participants shortly.

Please contact [registryhelpdesk@ebmt.org](mailto:registryhelpdesk@ebmt.org) if you are interested and we will pass your details to the Czech National Stem Cell Transplant Registry. The invite is also open to centres outside of the Czech Republic.
