Saving lives since 1974

About the EBMT Membership:

The EBMT is a collaborative peer network of professionals working in centres and as individuals, in the fields of clinical bone marrow transplantation, gene therapy and cellular therapy. Together, they make up the membership of our organisation. Join our community of experts! Our network consists of over 6,000 physicians, nurses and other healthcare professionals in over 70 different countries.

We encourage education and the optimisation of clinical practice.

The EBMT membership encourages members to improve scientific and clinical practice with the help of studies that are coordinated through 10 Working Parties and the Nurses Group. Members contribute to and benefit from the collective knowledge that the EBMT has accumulated, with the main goal of saving the lives of patients with blood cancers and other life-threatening diseases.

Benefits for all members:

Initiate and/or participate in the studies of the Working Parties.

Receive information about cooperative studies and results of EBMT research projects.

Be eligible for discounts for the EBMT Annual Meeting and the EBMT educational events.

We offer special fees.

Are you a resident of a low-to-middle income country, a student or from a non-European country? The EBMT offers special fees to these members, check out our website for more information. Please note that benefits for these members are the same as for regular paying members.

Which member are you?

Centre members

Centre Members of EBMT are centres active in the field of transplantation, gene therapy and cellular therapy related to any kind of hematopoietic stem cells or immunomodulatory cells or any other organisation involved in the care of donors and recipients of hematopoietic stem cells. Patient Associations can also become Centre Members.

Benefits that come with this membership include:

- Be eligible for a 50% discount on JACIE Accreditation fees.
- Have access to the EBMT Registry to store /retrieve your data and obtain statistical overviews.
- Vote in the EBMT elections of Working Party Chairpersons and the President of the EBMT Nurses Group.

Individual members

Individual Members within the EBMT consist of healthcare professionals actively involved in transplantation of any kind of haematopoietic stem cells, in the fields of gene therapy or cellular therapy, or in the care of donors.

Individual Members should hold a degree (MD, PhD, nursing degree or any other relevant degree to be assessed on a case-per-case basis) and demonstrate an expertise in stem cell transplantation, cellular therapy or other relevant fields. Students, patients and patient advocates can also become Individual Members.

Benefits that come with this membership include:

- Get free online access to the Bone Marrow Transplantation journal.
- Continue your education by having member access to the EBMT E-learning platform.
- Become part of one of the EBMT Working Parties
