

The EBMT **Data Management Group** is pleased to offer once again a range of educational, scientific and training sessions for Data Management professionals as part of the [Annual Meeting in Lisbon](#) in 2018.

You will be also pleased to know that this year EBMT offers a **Data Management Day Card**, for those of you who cannot attend the whole of the Meeting and can only come for one day on either Monday or Tuesday.

Please see the link for registration: <http://ebmt2018.org/registration/>. All participants will need to register, whether they are coming for one day or the whole congress.

Education Sessions in Auditorium 3 (*No need to book*)

There will be a varied [programme](#) for data management professionals at all levels of their career, which should be of interest to everybody, regardless of background.

These sessions are open to everyone - so no need to book, just turn up at the session. The sessions will enhance your knowledge whether you are new to the field or an experienced data manager.

Also, we look forward to introducing you to the new registry system MACRO as part of our Registry Upgrade Project. There will be Demos by our Software providers held on Monday and Tuesday.

Session topics will include:

- Macro Demo
- Lymphoma – Med-A, New drugs and treatments
- Chimerism
- Gene Therapy
- Med-A Discussion Forum
- Live Survey – interactive session on data collection issues
- History of CML Treatment
- Infections
- Relevance of haematological values, sensitivity levels
- Allograft with the focus on Med-B
- Session on Cell Therapy with the focus on Cell Therapy Form
- Benchmarking of transplant outcomes

Data Management Education Sessions will take place as usual on Monday and Tuesday (19-20 March 2018) and will be held in Auditorium 3 of the Congress venue.

We recommend that you try to attend as many sessions as possible - even if they do not seem to relate directly to your area of work.

In the past, we have found that people learn more about transplants by finding out what is involved in a diverse range of areas. We always encourage active participation in these sessions, raising issues and requesting clarifications, so that we can all learn from each other.

EBMT Registry Training Sessions in Auditorium 4 (*Pre-booking essential*)

At EBMT 2018 we will still be offering training on how to use ProMISe.

We will be providing training on Data Entry for beginners, HLA data entry and How to use reports to clean data, a session for more advanced users that may help with data cleaning before you move to the new Registry.

We are also excited to let you know that we will be holding some preliminary training on the new Registry system MACRO. We look forward to offering you a taster of the new system and receiving your feedback.

Please note: Places for the ProMISe and Macro training sessions are limited so early booking is essential. If you would like to attend any of them please go the [booking form](#).

Please contact khrystyna.valkiv@ebmt.org if you have any questions regarding the ProMISe or MACRO training sessions.

A more detailed description of each training session in Auditorium 4 is overleaf.

EBMT Registry Database Training sessions, Lisbon 2018

Below you will find full details of Data Management training sessions offered at the EBMT Annual Congress in Lisbon in 2018.

Name of the Training Session	Date	Time	Who is the training for?	Brief Training Description
Macro training	19 March 2018	09.45-12.30	Everyone who will use the system in future	We will be holding some preliminary training on the new Registry system MACRO. We look forward to offering you a taster of the new system and receiving your feedback. <i>(This session will be repeated on Tues afternoon if you cannot attend this one)</i>
Data Entry	19 March 2018	13.45-16.30	Beginners	This is an introductory session for new users to ProMISe, illustrating how to enter a MED-A registration, including subsequent transplant data and patient follow-ups. The session will start with a Demo of how to enter a Med-A form, given by EBMT Registry staff. There will be time during the second half of the session for hands-on practice using example data.
HLA Data Entry	20 March 2018	09.00-10.30	Experienced users	This session will explain how to enter HLA typing reports for centres performing Allografts. (If your national registry enters this on your behalf you do not need to attend). This session is aimed primarily at experienced database users. You must have attended a beginners' data entry session before this one.
Using Reports to clean Data in ProMISe	20 March 2018	11.00-12.30	Experienced users	The aim of this session is to demonstrate how to clean and tidy up your data using reports and maintain a certain standard of data reporting. This session will also be of use before you move to the new Registry system.
Macro Training	20 March 2018	14.45-17.35	Everyone who will use the system in future	<i>(Repeat of Monday)</i> . We will be holding some preliminary training on the new Registry system MACRO. We look forward to offering you a taster of the new system and receiving your feedback.
