April 2011

Subject: Collaboration to collect Autologous transplant outcomes in Lymphoma and Myeloma (CALM).

Dear Colleague,

We greatly appreciate your participation in this important study.

The EBMT decided that, in general, for non-interventional prospective studies no ethical approval is necessary. However, this can differ per centre. Please contact your Ethics Committee in case of any doubts.

A patient consent form should be collected for this non-interventional prospective study as standard procedure of transplant management.

Please collect these consent forms on every consecutive eligible patient you will include in this study and file them at your centre.

Thank you very much for your cooperation.

Sincerely,

Anja van Biezen,
Marcha Suits,
